What was read, and where it stands

14 control areas, each read from the system that enforces it, plus 1 recommended but not licensed (not scored).

CONTROL AREA	READ FROM	MEASURE	STATUS
ENDPOINT SECURITY			
Local admin rights	AutoElevate	27 / 31 without standing admin	Partial
Application allowlisting	ThreatLocker · Zero Trust	28 / 31 in Secure mode	Partial
Antivirus	Microsoft Defender	31 / 31 protected	On track
Managed detection & response	Huntress	31 / 31 reporting	On track
Security stack coverage	Across ThreatLocker · Huntress · Action1 · Intune · AutoElevate	29 / 31 devices fully covered	Partial
Workstations	Microsoft Intune	29 / 31 compliant	Partial
Patching	Action1	27 / 31 no critical updates missing	Partial
IDENTITY AND ACCESS			
Identity Threat Detection & Response	Huntress ITDR	26 identities watched 24/7	On track
Risk-based activity	Entra ID P2	— not licensed	Recommended
Email authentication	DMARC	1 / 1 domains protected	On track
Multi-factor authentication	Microsoft Entra	24 / 26 users enforced	Partial
Conditional Access	Microsoft Entra	3 / 4 baseline policies on	Partial
Microsoft 365 security alerts	Microsoft Defender XDR	0 open high-severity	On track
RESILIENCE AND PEOPLE			
Backup	Microsoft 365 backup	100% mailboxes and SharePoint backed up	On track
Security training	Training platform	25 / 26 completed this quarter	On track

Indicative maturity, per strategy

Calculated from the signals Evisent Live can see. Indicative, not an assessment.

STRATEGY	HOW IT IS MEASURED	INDICATIVE LEVEL	STATUS
Application control	ThreatLocker allowlisting with ringfencing	ML2	At ML2
Patch applications	Critical patches within 48 hours via Action1	ML2	At ML2
Configure Office macros	Macros from the internet blocked	ML2	At ML2
User application hardening	Browser hardening applied (gaps)	ML1	Working towards ML2
Restrict admin privileges	AutoElevate: no standing local admin	ML2	At ML2
Patch operating systems	Windows updates within 14 days (gaps)	ML1	Working towards ML2
Multi-factor authentication	MFA enforced; admins phishing-resistant (gaps)	ML1	Working towards ML2
Regular backups	Microsoft 365 backed up 3x daily, restore tested	ML2	At ML2

Essential Eight maturity here is indicative, drawn from configuration evidence. It is not an assessment against the ASD Essential Eight Maturity Model.

What this pack is, and isn't

Evisent Live reports configuration and status read from Microsoft 365 and security tools. It is not an audit, a certification or an opinion that a practice is compliant, and a high score doesn't mean a practice can't be breached. It can't see paper records, physical security or staff behaviour beyond training data.

Verifying a pack

Each pack carries a verification code. Anyone holding the PDF can confirm at verify.evisent.com.au that it hasn't been altered. Packs are kept 7 years. This is a sample: its code, SAMPLE-DEMO, does not verify.

About the demo company

Acme Accountants is a made-up practice. Every name, number and event in this pack is invented to show what a Live Evidence Pack looks like. None of it is a client result.
